**Cancel Claims 6-7.**

**Change the title to read – Field Effect Transistor. --**

**DETAILED ACTION**

**Priority**

Acknowledge is made of applicants' claim for foreign priority base on an application 2001-064318 filed in Japan on 03/08/2001.

It is noted that Applicants have filled a certified copy of said application as required by U.S.C 119, which papers have been placed of record in the file.

**Oath/Declaration**

The oath/declaration filed on 9/28/2001 is acceptable.

### **Information Disclosure Statement**

This office acknowledges of the following items from the Applicant:

Information Disclosure Statement (IDS) filed on October 12, 2000 and made of record . The references cited on the PTOL 1449 form have been considered.

### **Specification**

The specification has been checked to the extent necessary to determine the presence of all possible minor errors. However, the applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.

### **Reason for allowance**

**Claims 1-6 are allowed.** The following is an examiner's statement of reason for allowance:

**Set of claims 1, 3-5:** none of the references of record teaches or suggests the claimed Field effect transistor having punch-through stopper layer of the first conductivity type formed in contact with said source region at a location deeper than a junction between said source region of the second conductivity type and said semiconductor substrate of the first conductivity type in such a gate overlap structure that said punch-through layer penetrates from beneath an end face of said gate insulation film adjacent to said source

electrode toward said drain electrode in contact with said gate insulation film  
and among other steps/limitations as claimed in independent claim 1.

**Independent claim 2:** none of the references of record teaches or suggests the claimed Fields effect transistor (in addition to other limitation as claimed in independent claim 1), comprising: a field relaxation layer of the second conductivity type formed in contact with said drain region in such a gate overlap structure that said field relaxation layer extends from beneath an end face of said gate insulation film adjacent to said drain electrode toward said source electrode in contact with said gate insulation film; wherein said field relaxation layer penetrates from beneath an end face of a gate electrode side wall toward said source electrode for a distance of at least  $0.15\mu\text{m}$ .

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance".
